PRODUCT BROCHURE

Laser Cleaning Machines

Complete model reference — specifications, codes and indicative pricing

Made to Order · CE Certified · Delivered Nationwide

Prices are indicative, ex-VAT, correct as at 3 November 2026 — confirm current pricing when you enquire.

Make Things Easy

Category Overview

High-performance laser cleaning systems for surface preparation, paint removal and industrial maintenance — with CE, FDA, ETL and SGS-aligned documentation support.

Code	Category	Models	Pricing
LCC	Continuous-Wave Laser Cleaners	5	From ZAR 126 600
LCP	Pulsed Laser Cleaners	4	From ZAR 174 100
LCS	Automated Laser Cleaning Solutions	3	Price on Request

Pricing shown is indicative (from the lowest-priced model in each category) — see individual category pages for full model-by-model detail.

Continuous-Wave Laser Cleaners

LCC · From ZAR 126 600

Continuous-beam cleaning built for speed across larger surfaces — sheet metal, rust and coating removal at up to 300mm cleaning width.

APPLICATION Large-area, fast surface cleaning — heavy rust removal & thick coating/paint stripping

BEST SUITED FOR Sheet metal, robot production, automotive repair, ship maintenance

POWER SOURCE Single/Three-Phase 220–380V

Model	Power	Cooling	Cleaning Width	Weight	Typical Use
LCC-1200	1.2kW	Air-cooled	300mm	36kg	Sheet metal, robot production (pricing TBC)
LCC-1500	1.5kW	Water-cooled	300mm	190kg	Sheet metal, automotive repair, ship maintenance
LCC-2000	2.0kW	Water-cooled	300mm	190kg	Sheet metal, automotive repair, ship maintenance
LCC-3000	3.0kW	Water-cooled	300mm	235kg	Heavy-duty sheet metal & ship maintenance
LCC-6000	6.0kW	Water-cooled	200-500mm	235kg	High-throughput industrial line cleaning (pricing TBC)

LASER CLEANERS

Pulsed Laser Cleaners

LCP · From ZAR 174 100

Nanosecond-pulse cleaning with minimal heat-affected zone — precise rust, paint and oxide removal without damaging the substrate.

APPLICATION Precision surface prep — rust, paint & oxide removal with minimal heat damage to the substrate

BEST SUITED FOR Mold, automotive repair, ship maintenance, aircraft restoration

POWER SOURCE Single-Phase 220V

Model	Power	Cooling	Cleaning Width	Weight	Typical Use
LCP-200	0.2kW	Air-cooled	100mm	25kg	Spot rust/paint removal, mold cleaning
LCP-300	0.3kW	Air-cooled	100mm	25kg	Automotive manufacturing & repair
LCP-500	0.5kW	Air-cooled	120mm	30kg	Ship maintenance, aircraft restoration
LCP-1000	1.0kW	Water-cooled	120mm	220kg	Heavy-duty mold & production line cleaning

Automated Laser Cleaning Solutions

LCS · Price on Application

Engineered-to-order automated lines built around the SF-HC handheld laser head range, for conveyorised or robotic cleaning at production scale.

APPLICATION In-line, automated cleaning integrated into a production or conveyor system

BEST SUITED FOR Steel plate lines, tyre inner liner prep, LNG pressure vessel cleaning

POWER SOURCE 0.5–20kW (system-dependent)

System	Power Range	Cleaning Mode	Typical Applications
LCS-STEEL	1.5-20kW	Non-contact, conveyorised	Oxidation/rust/paint removal on steel plate, 800mm+ length
LCS-TYRE	0.5-1kW	Non-contact, MES-integrated	Tyre inner liner prep — raises frictional coefficient
LCS-VESSEL	0.5-1kW	Non-contact, robotic arms	LNG pressure vessel outer walls, seal heads, weld seams

CONTACT & ORDERING

Ready When You Are

Every model in this catalogue is made to order. Reference the Easysmith code when requesting a quotation – and try out the Selection Guide if you're uncertain.

- easysmith.co — browse the range & download this catalogue
- info@easysmith.co · +27 84 391 8732
- Response within 2 business days
- Delivered nationwide, across all 9 provinces
- CE certified · SANS/OHS compliant · ISO 9001:2015
